FR FRAME SERIES

FRAME FOR ENC/DEC SERIES CARDS AND DMM DVB GATEWAYS

PRODUCT DESCRIPTION

The FR frame series is designed for robust and secure operation of Teracue's card-based IPTV and video networking system. Video processing cards of the ENC, DEC and DMM product series can flexibly be operated inside the FR frame.

ENC/DEC SERIES:
The FR series for ENC/DEC consists of 2 differently sized models, enabling custom-sized streaming systems and IPTV headends. The FR-610 for max. 6 cards is designed for high-density and multichannel streaming applications. It is available with redundant power supply (FR-610-DPS) and with a single power supply (FR-610). Both FR frame models are industrial grade enclosures.

DMM SERIES:
The FR series for DMM consists of 2 differently sized models, enabling custom-sized streaming systems and IPTV headends. Customers can chose between the DMM-100-FR-1RU for up to 2 cards and the DMM-100-FR for up to 8 cards with redundant power supply.

FR frame models ensure ideal operating conditions for Teracue video cards and enable 24/7 operation.
