

PC PLAYER FOR LIVE STREAMVIEWING APPLICATION

PRODUCT DESCRIPTION

The XPLAYER Software is the ideal application for receiving and viewing live streams that originate from unicast or multicast streams on your network. With XPLAYER you have easy access in excellent quality even during 24/7 operations.

The XPLAYER can be operated in a simple IPTV system as a single executable software player for Windows PC's, or even in complex installations in combination with the ICUE-SERVER. Even third-party streaming sources can be viewed with XPLAYER if the corresponding protocols are supported.

XPLAYER supports multiple streaming protocols and the decryption of Teracrypt encrypted streams and the central configuration of a channel list by administrators.

KEY FEATURES

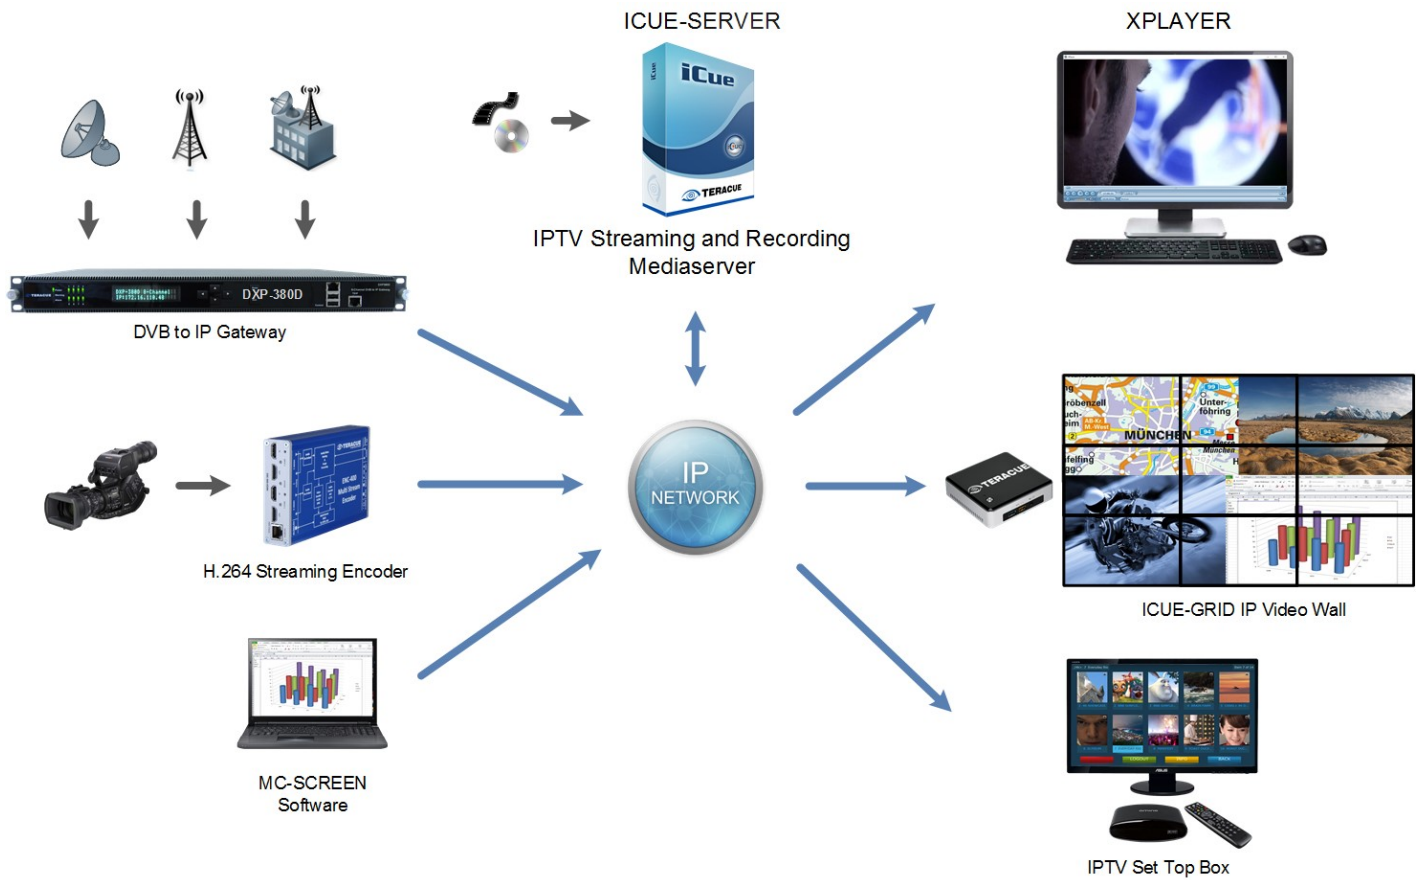

- Supports SD, HD, 4K, MPEG-2, H.264, H.265 HEVC
- Playback of live, NVOD and VoD
- Single frame navigation for detailed analysis
